

Dear Valued Customer

Your Transition To Commonwealth Oil EDM Fluids

Congratulations on your decision to purchase the world's leading Dielectric Fluids through TRI-GEMINI, LLC. We are proud to have selected as the EDM Fluid Supplier to a long and distinguished list of aerospace, automotive, and general manufacturing companies, and to now serve you as well.

This letter responds to an inquiry about commingling of Commonwealth Oil Dielectric fluids with competitors' fluids in EDM applications. We have provided this letter to TRI-GEMINI, LLC, our Authorized Distributor, to give to you.

As part of your changeover to a Commonwealth Oil Dielectric Fluid, you may add our EDM Fluid to any existing dielectric fluid manufacturer's product which you may be currently using in your EDM operations. We have received many reports from customers who observe immediate benefits even while the changeover process is in process.

To obtain the maximum health and safety benefits as well as performance benefits, we recommend your changeover be completed as quickly as possible. Should you decide on a full changeout, your TRI-GEMINI representative is also qualified to help you obtain Commonwealth Oil EDM Cleaning and Flushing Fluids. This process will serve to maximize the full effect of using Commonwealth EDM fluids.

We promise to continue our leadership role in providing the EDM industry with better and safer dielectric fluids, and we thank you for your confidence in us.

Fred Herdman
President
