

ALECTROL 240

ALECTROL 240 is an extra light EDM Fluid designed for use on any EDM machine and on all metals. **ALECTROL 240** is blended specifically for very fine and intricate work.

Product Highlights:

- High metal removal rates
- Low electrode wear
- No unpleasant fumes
- High dielectric strength
- Excellent flushing action
- Excellent filterability
- High flash point
- Designed for fine or rough finishes
- Safe on tank sealing materials
- Resistant to oxidation (yellowing)

ALECTROL 240 lowers your overall costs due to longer life and reduced oil changes. **ALECTROL 240** has excellent operator acceptance due to its clean, clear appearance.

Specifications

Flash Point °F	235
Boiling Point °F	> 400
Specific Gravity	< 1
Viscosity SUS @ 100 °F	33
Sulfur Content	Nil
Odor	Nil
Evaporation	Nil
Distillation Range	438 – 470
